a2 B1
7. (Amended) Pull-out guide fittings as claimed in claim 1, characterized in that the damping device (7) is effective between the drawer track (5) and the center track (6).

a3 Sub 10
8. (Amended) Pull-out guide fittings as claimed in claim 1, characterized in that the damping device (7) is effective between the support track (3) and the center track (6).

a4 Sub 11
9. (Amended) Pull-out guide fittings as claimed in claim 1, characterized in that between the support track (3) and the center track (6), as well as also between the center track (6) and the drawer track (5), a damping device (7) is effective.

Sub 13
10. (Amended) Pull-out guide fittings as claimed in claim 1, characterized in that the stops (8) are formed by plates which project from the tracks (3, 5, 6) laterally and/or downwardly.

11. (Amended) Pull-out guide fittings as claimed in claim 11, characterized in that the damping device (7) comprises a rotary damper with a pinion (11), wherein the pinion (11) meshes with two traverses (9) with toothed rack profile.

a5
12. (Amended) Pull-out guide fittings as claimed in claim 1, characterized in that a coupling attachment is provided for coupling the drawer track (5) and the center track (6), and that the damping device (7) is effective between the drawer track (5) and the support track (3) or between the center track (6) and the support track (3).

13. (Amended) Pull-out guide fittings as claimed in claim 1, characterized in that it is developed as a differential pull-out with a control between the tracks (3, 5, 6) and that the damping device (7) is effective between at least two of the tracks (3, 5, 6).

14. (Amended) Pull-out guide fittings as claimed in claim 15, characterized in that a coupling attachment for coupling the drawer track (5) and the center track (6) is provided as well

as also a control for the differential moving of the tracks (3, 5, 6) and that this control is effective only over a portion of the path of motion of the drawer.
